New! Reedy Crawler 550 14T 5-Slot Brushed Motor

Reedy's Crawler 550 14T 5-slot motor is the same motor that comes standard in the Element Enduro Gatekeeper RTR. Now available separately, this motor is highly capable, unlike typical "throw away" RTR motors. Due to its longer 550 design, the Crawler 550 offers exceptional torque and power output while its 5-slot armature delivers precision throttle control for a variety of surfaces and course conditions.

Long-wearing brushes, fixed 0° timing, low-friction bushings, and silicone lead wires make this a highly valuable yet cost-effective performance upgrade for your truck.

Visit www.reedypower.com for a complete list of spare parts and upgrades.

Features

- High-torque 550 configuration
- 5-slot armature for precision control
- Long-wearing brushes
- Fixed 0° timing
- Low-friction bushings
- Silicone lead wires
