

For Immediate Release: March 13, 2019

New! Reedy Radon 2 Brushed 5-Slot Crawler Motors

Reedy's all-new Radon 2 5-slot Brushed Crawler motor is now available!

The Radon 2 Crawler motor's 5-slot design delivers a smooth powerband for precision control while traversing steep, uneven, or rocky terrain. Dual ball-bearings improve performance and reliability while adjustable timing allows for adjustments to compensate for different drivetrain configurations that require reverse motor rotation. These features together result in a powerful, reliable, economical, and versatile choice for those who prefer brushed motor power.

The Radon 2 Crawler motor is available in 12T, 16T, and 20T versions to suit a variety of applications and speed requirements.

Visit www.reedypower.com for a complete list replacement and option parts.

Features

- Dual ball bearings
- Adjustable timing
- Ultra-smooth 5-slot armature
- Completely rebuildable

Specifications

Cells	2S-3S LiPo/6-9cell NiMH
Diameter (mm)	36
Length (mm)	53
Shaft Diameter (mm)	3.175
Weight (g)	169
