For Immediate Release: December 1, 2016

New! Reedy 540-SL4 Sensorless Brushless Motor

Reedy's new 540-SL4 is the perfect upgrade for your RTR! Due to its sensorless 4-pole configuration, the 540-SL4 operates powerfully, efficiently, and reliably in a variety of vehicles and applications.

The 3300kV rating provides plenty of speed with 2S LiPo batteries. But install a 3S LiPo battery for insane speeds that are barely controllable! A high-strength rotor provides plenty of torque and resists overheating better than 2-pole alternatives.

Flexible silicone wires ease wire routing in tight spaces and work in conjunction with 3.5mm bullet connectors to reduce power-robbing resistance and heat. Triple insulated windings, a hardened steel shaft, and oversized ball bearings enhance reliability to keep you out of the pits and on the track.

Features

- Powerful 4-pole sensorless design
- Oversized precision ball bearings
- High-strength rotor
- Hardened steel shaft
- Triple insulated windings
- Flexible silicone wires
- Low-resistance connectors

Specifications

Cells	2-3 LiPo, 4-9 NiMH
kV rating	3300
Applications	1:10 buggy, truck, touring car
Dimensions	52mm x 36mm
Shaft Diameter	3.17 mm (1/8")
Weight	211g
Power Wires	12-gauge silicone
Connectors	3.5mm

UPC: 784695 009073

#907
