

**SpPz 2 „Luchs“**

Der ab 1975 in den Panzeraufklärungsverbänden der Bundeswehr eingesetzte Spähpanzer 2 „Luchs“ ist gut gepanzert, verfügt über eine integrierte ABC-Schutzanlage und zeichnet sich durch äußerst leise Fahrgäusche aus. Die acht grossvolumigen Niederdruckreifen weisen Notlaufeigenschaften auf. Bis zu einer Geschwindigkeit von 30 km/h können alle vier Achsen gelenkt werden. Der „Luchs“ wird von einem DB 10-Zylinder Vielstoffmotor mit 389 PS angetrieben und erreicht eine Höchstgeschwindigkeit von bis zu 90 km/h auf der Strasse. Als Bewaffnung dient eine RH 202 20mm Bordmaschinenkanone. Die Besatzung besteht aus Kommandant, Richtschätzte, sowie Vorwärts- und Rückwärtssfahrer/Tastfunker. Der SpPz 2 A2 wird auch im Rahmen der SFOR in Bosnien und der KFOR im Kosovo zu friedenssichernden Massnahmen eingesetzt.

**SpPz 2 „Luchs“**

The Spähpanzer 2 Luchs that has been used by the Federal German Army reconnaissance units since 1975 is well armoured, has a built-in NBC system and is characterized by extremely quiet running. The eight high-volume low-pressure tyres have emergency running properties. Up to a speed of 30 km/h all eight wheels can be steered. The Luchs is driven by a 389 hp DB 10 cylinder multi-fuel engine and develops a maximum road speed of 90 km/h. The armament consists of an RH 202 20 mm machine cannon. It is crewed by a commander, gunner, and front and rear driver/radio operator. The SpPz 2 A2 is also used on peace-keeping missions by SFOR in Bosnia and KFOR in Kosovo.
