Unimog U 1300 L Kommunal "Winterdienst"

Ursprünglich wurde das Universal-Motor-Gerät, kurz Unimog, als landwirtschaftliches Fahrzeug entwickelt, um die Versorgungslage der Bevölkerung nach dem zweiten Weltkrieg zu verbessern. 1951 zählte der Daimler-Benz Unimog zu den ersten Lastwagen mit Allradantrieb. Im Laufe der Zeit bewährte sich das Ausnahmefahrzeug dank seiner Vielseitigkeit in vielen Bereichen zum Wohle des Gemeinwesens, darunter auch als Kommunalfahrzeug für den Winterdienst. Der Einsatz und die Ausrüstung von Winterdienstfahrzeugen ist im Wesentlichen eine Frage der richtigen Fahrgestellauswahl und der Zusatzgeräte. Der Unimog wird bevorzugt in bergigen Gegenden von den Kommunalbehörden eingesetzt. Während des gesamten Jahres ist das allradgetriebene Fahrzeug dort im Einsatz. Besonders im Winter zeichnet er sich durch extreme Geländegängigkeit aus und findet als Schneeräum- und Salzstreufahrzeug große Anwendung. Der Winterausrüstungs-Hersteller Schmidt liefert ein speziell auf den Unimog abgestimmtes Programm an Räumgeräten. Aufgrund der hochbelastbaren Vorderachsen wird der Unimog mit einem Vorbau-schneepflug versehen. Der Pritschenaufbau ist mit einem Silo-Streugitter bestückt, der 3 m³ Streugut fasst und das über einen speziellen Streuteller verteilt wird. Mit dieser gesamten Ausrüstung wird das Räumen von Eiskrusten und festgefahrenen Schneedecken ermöglicht.

Unimog U 1300 L local authority winter service vehicle

The Universal-Motor-Gerät, known for short as the Unimog, was originally developed as an agricultural vehicle, to improve the supply situation of the populace after World War II. In 1951, the Daimler-Benz Unimog was one of the first all-wheel drive trucks. Thanks to its versatility, over time this exceptional vehicle has proved its value to the community in many areas, including as a local authority winter service vehicle.

The application and equipment of these winter service vehicles is essentially a question of the correct choice of chassis and accessories. The Unimog is preferred by local authorities in mountainous areas, where all-wheel drive vehicles are used all the year round. In winter in particular, it comes into its own due to its excellent cross-country mobility and is used extensively for both snow clearing and road gritting. Schmidt, the manufacturers of winter equipment, supply a range of snow clearing appliances specially designed for the Unimog. The strong front axles of the Unimog facilitate the attachment of a front-end snow plough. The platform body carries an automatic spreader with a 3 m³ hopper and special distributing plate. Equipped in this way, the Unimog clears any road of packed ice and compressed snow.
