

For Immediate Release: July 15, 2024

## #30134 DC10 Drift Car Kit

ELECTRIC ▪ ON ROAD ▪ 1:10 SCALE ▪ 2 WHEEL DRIVE ▪ KIT

Since 1964, Team Associated has proven to be the leader in competition racing. And with its roots in on-road racing, it makes sense that our Area 51 engineers would develop the ultimate RC drift car, the DC10. In RC drifting, vehicle balance is key. With the many suspension and chassis tuning options of the DC10, drivers can set up their car with precision. From camber, caster, and kingpin inclination (KPI), to motor and battery position, the Team Associated DC10 1:10 RWD Competition Drift Kit has it all!

## HIGHLIGHTS

# DC10

1:10 RWD COMPETITION DRIFT KIT

Adjustable wheels hexes allow the track width to accommodate most body or wheel combinations.

A convenient quick-release battery box makes it simple to change batteries.

The motor position can be mounted high, and battery moved back for more rear weight bias.

Our race-proven threaded aluminum oil-filled shocks work with the chassis design to provide exceptional tuning options

With camber, caster, toe-in, KPI, and more, there are many geometry tuning options.

Carbon fiber upper deck provides two servo mounting options for adjustable weight balance.

*Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy motor, battery, ESC, servo, receiver, wheels, tires, body, and pinion gear. Assembly and painting required.*

## MORE FEATURES

- Factory Team hard-anodized threaded aluminum shocks
- Factory Team 2.5mm carbon-fiber drift chassis
- Factory Team 2.5mm carbon-fiber shock towers
- Two Factory Team 2.5mm carbon-fiber top plate options included
- Factory Team blue-anodized aluminum chassis post
- High and low motor mounting options
- +6mm transmission height adjustment insert allows for higher roll center and larger spur gear
- Maximum steering throw for optimal control drifting through turns
- Easy-to-tune caster adjustments can be made without tools
- Adjustable battery placement
- Fully tunable, blue-anodized aluminum Ackermann plates
- Easy-to-adjust camber
- Adjustable offset wheels hexes
- Adjustable servo mount locations
- Precision rubber-sealed ball bearings throughout
- Rear mounted electronic speed control (ESC) plate
- Adjustable rear anti-squat and toe-in

## SPECIFICATIONS

Scale	1:10
Power	Electric
Front Width	172mm (6.7")
Rear Width	180mm (7")
Wheelbase	257mm (10.1")
Transmission Ratio	2.6:1
Drivetrain	RWD/2WD
Environment	Drift Track

## ITEMS NEEDED TO COMPLETE

- 1:10 scale 540-size electric motor (#27481 Sonic 540-SP5 13.5T Brushless Motor)
- 1:10 scale electronic speed control (#27016 Blackbox 610R Competition ESC)
- 7.4V-7.6V 2S LiPo with "shorty" battery dimensions (standard or low-profile height) (#27397 Reedy Zappers SG5 LiPo 4000mAh 130C 7.6V LP Shorty)
- Radio control battery charger (#27203 Reedy 1416-C2L Dual AC/DC Competition Balance Charger)
- Drift steering gyro
- 2-channel RC car surface transmitter and its batteries
- 2-channel receiver
- Steering servo (#27154 Reedy RS1606A Low-Profile Hi-Speed HV Servo)
- Pinion gear (48 pitch)
- Spray paint for Lexan body
- 1:10 scale wheels and tires
- Other helpful items: Silicone Shock Fluid, Silicone Diff Fluid, Body Scissors (#1737), Reamer (#1499) / Hole Punch, FT Wrench Set (#1519), Hobby Knife, Needle Nose Pliers, Wire Cutters, Soldering Iron, Calipers or a Precision Ruler

## CATALOG INFORMATION

UPC	Part No.	Description	MSRP	MAP	Available
78695301344	30134	DC10 Drift Car Kit	\$439.99	\$299.99	July 2024
