

For Immediate Release: July 26, 2021

New! DR28 Drag Race Car RTR

Team Associated's DR28 1:28 scale electric 2WD RTR Drag Race Car may be small in size, but it's packed full of features and ready for fun right out of the box. The DR28 is a no-nonsense pint-sized Drag Car that looks great and drives smooth thanks to a powerful electric motor and capable drivetrain.

No need to prep or build your racer; just charge it and you're ready to drive! The included 2.4GHz transmitter allows complete control, enabling you to navigate around, through and over obstacles with ease! The DR10-inspired wheels and body make for a great-looking package that will also perform well on the staggered-size foam tires.

When the DR28's integrated LiPo battery becomes discharged, the convenient built-in transmitter charger makes it easy to get back to full power and ready to run in less than an hour. A built-in rechargeable LiPo battery and 4 AA's are included, making the car ready to go right out of the box!

This box contains all required items to drive

2.4GHz transmitter with built-in charging cable
