## Factory Team Carbon Fiber Composite Option Parts

#71139

#71141

#71151

#71152

Team Associated is pleased to offer a new line of carbon fiber composite option parts for the RC10B6.3, RC10B74.1, RC10T6.2 and RC10SC6.2 (also previous generation models). Impregnated with rigid and light carbon fibers inside the injection molded material, these Factory Team parts are the ultimate in high performance.

- **Lightweight** - Approximately 12% weight savings over “hard” material.
- **Extreme Rigidity** - More predictable handling in high traction applications and increased vehicle stability in fast corners.
- **Improved Durability** – Significantly improved strength over “hard” option parts.

Look for future Factory Team releases as Team Associated plans to produce several more molded parts in this amazing material! New “carbon fiber” material parts will replace “hard” material parts.

S = Spare Part. A replacement for the same part.  
O = Optional. A part that does not come with the vehicle.
