

with a ball differential.) Height-adjustment inserts allow driveshaft alignment through all ride height and axle height configurations

- Rear hub assembly with a aluminum vertical ball stud camber link mount and axle height inserts for precise roll center adjustment
- Front wing mount and front wing included to increased downforce and front grip
- Integrated 30mm fan mount (fan not included) to prevent motor fade due to overheating
- 69mm CVA bones for reduced bone plunge and minimized friction at drive pin
- The symmetric rear arms with improved geometry and stiffness can be flipped to allow a "split" for rear shock mounting position. Arms are available in 73mm and 75mm lengths (73mm included)
- Outer rear hinge pin is captured with bolt head and lock nut for increased durability
- Aluminum ESC weight (13g) for low CG and easy electronics removal for cleaning
- 5mm aluminum clamping wheel hexes
- Lightweight aluminum one-piece top shaft and gear
- Body designed with lower center of mass improves handling on high-grip surfaces (clear body and wing included)
