

For Immediate Release: March 14, 2022

New Ball Differential Kit with Caged Thrust Bearing Set for 1:10 scale ball differentials

#91990 Caged Thrust Bearing Set, for ball differentials

#91991 RC10B6 Ball Differential Rebuild Kit with Caged Thrust Bearing

#91992 RC10B6 Ball Differential Kit with Caged Thrust Bearing

The new caged thrust bearing set for ball differentials is a precise and easy-to-use upgrade for Team Associated ball differentials. The caged thrust bearing simplifies assembly, automatically spacing the thrust balls for equal loading. The thrust balls run on two V-grooved thrust rings for minimal drag.

#91990 is a direct replacement for #6573 diff thrust washers and #6574 5/64" balls.

In addition, customers can buy a **#91992** complete ball differential kit with caged thrust and **#91991** ball differential rebuild with caged thrust bearing. These two new parts are direct replacements for #91702 and #7677, respectively.

Fits RC10B6.3D, B6.2D, B6.1D, B6D, T6.1, SC6.1, T6.2, and SC6.2, and older ball differential models.

UPC	Part No.	Description	MAP	MSRP	Available
784695919907	91990	Caged Thrust Bearing Set, for ball differentials	\$7.99	\$7.99	BUY NOW!
784695919914	91991	RC10B6 Ball Differential Rebuild Kit with Caged Thrust Bearing	\$19.55	\$22.99	April 2022
784695919921	91992	RC10B6 Ball Differential Kit with Caged Thrust Bearing	\$57.79	\$67.99	April 2022
