

For Immediate Release: December 21, 2022

New! 4WD Front Wheels, +1.5mm

#92362 4WD Front Wheels, 2.2", 12mm hex, +1.5mm, white

#92363 4WD Front Wheels, 2.2", 12mm hex, +1.5mm, fluorescent yellow

Team Associated is proud to launch a new offset front wheel for the B74.2 4WD buggy platform. The +1.5mm 1:10 scale 2.2" wheel is the optimal width for carpet racing where the low-profile tires allow for added track width. The team also prefers to run the new offset for dirt racing, with [setups](#) by Spencer Rivkin, Dustin Evans, and Aydin Horne using this offset.

Features:

- +1.5mm wider offset per side (3.0mm total) for maximum track width and stability
- +1.5 logo marked inside the wheel
- Air vent holes molded into the wheel
- Available in white and fluorescent yellow colors
- Fits all B74.2, all B74.1, all B74.
