New! Factory Team Aluminum Hubs for the RC10B7 and B7D

Associated Electronics announces new Factory Team aluminum hubs for the RC10B7. These hubs are a more durable alternative to the molded hubs and provide more unsprung weight, which can be used as a tuning option. The HRC (High Roll Center) hubs include the secondary bearing bore for the upcoming FT Universals. The HRC hubs allow for higher axle heights, which is great when running on high grip surfaces with smaller diameter tires and lower ride heights.

Both standard and HRC variants have color options of anodized blue or black with secondary machined chamfers and laser-etched FT logo.

(Right: #92471 RC10B7 FT Rear Hub Set, blue, mounted in the RC10B7.)
