

For Immediate Release: September 27, 2022

New! 13mm Truck Shocks and Springs

#71158 13x36mm Shock Bodies

#71159 FT 13x36mm Shock Bodies, with Genuine FOX Kashima Coat

#71161 13mm Front Springs, gray 4.60 lb/in, L54, 7.25T, 1.3D

#71165 13mm Rear Springs, gray 2.55 lb/in, L72, 8.75T, 1.2D

Upgrade your RC10T6.2 and RC10SC6.2 to 13mm shocks. 13x36mm shock bodies, 54mm truck front springs, and 72mm truck rear springs are available now! Truck front shocks use the existing 27.5mm length buggy rear shock.

Take advantage of the 13mm shock technology from the RC10B6.4 buggy that offers a superior ride for bumps and jumps. The larger 13mm-bore piston allows you to run lighter oils to get the low-speed feeling of a soft shock, but with more pack as you take off and land jumps. This translates to a truck that soaks up the bumps in and out of corners but packs up in the high-speed landings to give you the feeling of landing on a pillow.

Build new 13mm shocks or convert your 12mm truck shocks. (See supplemental parts list for every part used in a complete build by visiting the pages for [#71158](#) and [#71159](#) in the Documents tab.)
