New! TR28 Truggy RTR

Team Associated's TR28 1:28 scale electric 2WD RTR Truck may be small in size, but it's packed full of features and ready for fun right out of the box. The TR28 is a no-nonsense pint-sized Truggy that looks great and drives smooth thanks to a powerful electric motor and capable drivetrain.

No need to prep or build your racer; just charge it and you're ready to drive! The included 2.4GHz transmitter allows complete control, enabling you to navigate around, through and over obstacles with ease! The increased ground clearance and rubber tires allow the TR28 to handle like no other vehicle in its category.

When the TR28's integrated LiPo battery becomes discharged, the convenient built-in transmitter charger makes it easy to get back to full power and ready to run in less than an hour. A built-in rechargeable LiPo battery and 4 AA's are included, making the truck ready to go right out of the box!
