DUAL CHARGING
Dual Ports for all Traxxas High-Current Connectors
with Integrated Balance Connectors for Traxxas iD Batteries

iD
Auto Battery
Identification

Simple. Fast. Just plug in a pair of Traxxas' batteries with iD and press start. Traxxas' exclusive iD technology eliminates complicated charger programming by automatically configuring and optimizing the charge settings for Traxxas iD batteries. The EZ-Peak Dual charges two batteries simultaneously at up to 50 watts (4 amps) each, or switch to High-Output mode to charge a single battery at the maximum 100 watt (8 amp) output.* Charging faster means more fun time behind the wheel. You can even charge a NiMH and a LiPo at the same time! The progress bar and audible alerts keep you informed while the advanced high resolution peak detection delivers a perfect charge every time. The EZ-Peak Dual's Storage Mode protects your LiPo battery investment by safely preparing the batteries for extended storage.
*Do not exceed battery manufacturer's recommended charge rate.

Charge Two Batteries at the Same Time

EZ-Peak DUAL

Charge progress indicator	4A, 50W x 2 in Dual Charge Mode
Optimized for faster LiPo balance charging	8A, 100W x 1 in High Output Mode
One button LiPo storage charge protects your battery investment	Built-in balance ports for conventional LiPo batteries
Advanced high-resolution peak detection delivers a perfect charge	Charges 5-6 cell NiMH batteries
Easy to use interface	Charges 2S and 3S LiPo batteries
Built-in cooling fan	Audible alerts

FEATURES

The EZ-Peak Dual also features an Advanced Mode that makes it easy to quickly charge Traxxas batteries that are not equipped with Traxxas iD using a simple interface and full manual control. Includes built in balance ports for 2S and 3S LiPo batteries.
