BA004 "BOMB'R"

Paintings courtesy of V-Design

Directly inspired by our BA002 "R8c" winning design, here comes the brand new BA004 "Bomb'R".

This new shell will remain fast and smooth, with very good speed, and still a lot of steering.

It comes in clear 0.5mm LEXAN® , with a protective film.

The BA004 "Bomb'R" meets the last EFRA rules, and has been approved for 2010 big races, like the Euros.

- Available from the 1st of february.
- EFRA 2010 Legal, new rules.
- First batch 500pcs only.
